## DONOR EGG PROGRAM

## INFORMATION FOR PROSPECTIVE RECIPIENTS

Hugh D. Melnick, M.D., F.A.C.O.G.

Medical Director

# Donor Egg Program

The donor egg program at Advanced Fertility Services offers patients their choice of available egg donors.

The combination of donors, medical expertise and our commitment to patients makes Advanced Fertility Services donor egg program an attraction for patients from around the world.

Advanced Fertility Services makes certain that the patient has maximum control of their egg donor selection, timing of their cycle and their financial options. Egg donor patients can select their donor and begin treatment in just a few weeks.

Since 1983, Advanced Fertility Services has assisted thousands of patients to have healthy babies.

With Advanced Fertility Services extensive donor recruitment program, AFS egg donor patients select their donors from a large pool of talented, diverse and accomplished young women, including college students, many who are pursuing bachelor's degrees or other advanced degrees. Many of our donors also are business-women, athletes, musicians and professionals.

At Advanced Fertility Services, all donors are screened by our own physicians - never by outside agencies. Each donor meets the highest medical, genetic and educational screening standards.

By screening our donors, the staff gets to know the donors as individuals, and not just as profiles on a page or a donor number. This knowledge helps us to suggest matches, but ultimately, the choice of a donor is always completely up to the patient.

At Advanced Fertility Services' Egg Donor Program our patients save thousands of dollars of donor agency fees, as we provide donors without extra charges.

Large selection of egg donors available.

We hope that this brochure will answer many of your questions about Advanced Fertility Services egg donor program. To schedule an appointment or to speak to our donor egg coordinator, please call (212) 369-8700.

## You Select The Donor

Choosing a donor is an important decision to our patients, therefore Advanced Fertility Services provides patients with extensive information about the individual donors, including:

Donors Are Closely Matched With Recipients

- *Photo of Donor*
- *Blood type*
- *Height*
- *Weight*
- *Body build*
- *Eye color*
- *Hair color*
- *Hair texture*
- *Occupation*
- *Special interests*
- *Family medical history of egg donor*
- *Ethnic background of donor's mother and father*
- *Whether pregnancies have been achieved*
- *Years of education and major areas of study*

## Who Needs Donor Eggs?

Many women are unable to use their own eggs including women:

- Without or with poorly developed ovaries;
- With premature menopause;
- Where there is a chance of passing on inherited diseases;
- Who have had IVF where poor egg quality was found;
- With fertility problems after chemotherapy, surgery or illnesses.

## Egg Donor Program

- New York State Licensed Donor Egg Program\*\*
- Immediate Availability

All egg donors are screened for potentially transmittable illnesses such as hepatitis, HIV, and sexually transmitted diseases. Appropriate genetic testing is also performed for each donor.

## To Become An Donor Egg Recipient.

1) Schedule an initial consultation with one of Advanced Fertility Services expert physicians. Your consultation may be in person or by phone. During the consultation, the physician will review your medical history and determine the most appropriate treatment plan for your situation.

2) Following your consultation, you will be introduced to the Egg Donor Coordinator. Working in conjunction with your physician and the rest of the donor egg team, the egg donor coordinator will help you to find a donor just right for you.

The Coordinator will work with you throughout the entire egg donor process, including donor selection, scheduling the cycle, retrieval and the transfer of embryos

## Patient Policy - Older, Single and Same Sex Couples.

We treat older couples, single women and lesbian couples in their quest to have a child of their own. Advanced Fertility Services accepts all patients requiring fertility treatment.
